

# **Hikashop plugin for shipping collection lockers**

## **1. Overview**

This plugin implements the Hikashop collection locker custom field type required for the separately available Hikashop shipping plugin *plg\_hikashopshipping\_bfdeliverydates*.

On its own, without Joomla extensions which require it, this plugin will not serve any purpose.

This plugin requires [HikaShop Business](#).

# Hikashop plugin for shipping collection lockers

## 2. Custom Field Configuration

This custom field type can only be installed on the Hikashop *order* table.

Only one field with this custom field type can be installed.

Any value can be used for the field column name (recommended *order\_bfcollectionlocker*).

### 2.1 Core Custom Field Parameters

The screenshot shows the configuration interface for the 'order\_bfcollectionlocker' field. The interface is divided into several sections:

- MAIN INFORMATION:** Label: Collection locker, Table: order, Column name: order\_bfcollectionlocker, Field type: Brainforge - Collection locker, Published: Yes.
- RESTRICTIONS:** Categories, Including sub categories (Yes/No), Products, Shipping methods, Payment methods, Display limited to (all), Access level (None/all/Custom).
- MAIN ATTRIBUTES:** Required (Yes/No), Custom Error Message, Default value: Not ready for collection. PLG\_HIKASHOP\_BFDELIVERYDATESLOCKER\_POSTTEXT.
- DISPLAY:** Front-end, Back-end Form, Back-end Listing, Front-end order details page, Invoice, Shipping Invoice, Order additional information (all Yes/No).
- DISPLAY : MAIL:** Order notification, Order status notification, Order creation notification, Order administrator notification, Payment notification (all Yes/No).
- PREVIEW:** Collection locker, Not ready for collection. PLG\_HIKASHOP\_BFDELIVERYDATESLOCKER\_POSTTEXT.

### 2.2 Collection Locker Options

| COLLECTION LOCKER OPTIONS   |           |
|---|-----------|
| Ready to collect order status *   | Ready     |
| Triggers automatic allocation of locker and access code generation.<br>Locker automatic mode must be selected in the order shipping method. |           |
| Order status to clear locker data *   | cancelled |
| Triggers automatic removal of locker data from the order. Applies to both manual and automatic locker modes in the order shipping method.   |           |

In manual page the administrator can enter collection locker information here. Automatically generated lockers and access codes can also be modified.

The format is: L : C

Where L = Locker number

C = Locker access code
