

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

1. Overview

Using this plugin you can create multiple Hikashop shipping methods with additional criteria in addition to the built-in Hikashop restrictions.

- **Enhanced Postcode Handling**

Initially developed for use with UK postcodes it can also be used (or extended) to cater for other postcode formats. In some cases it may be easier to configure than built-in Hikashop postcode handling.

- **Customer Selectable Delivery Dates**

Depending on the shipping methods available for a customers postcode they can then select from a range of available delivery dates (including same day).

- **Enhanced Price Restrictions and Shipping Method Prices**

1.1 Example Shipping Method Listing

Key features are illustrated in following Hikashop shipping method listing.

Note that the shipping methods are processed in the order listed (Hikashop feature).

Name	Price	Restrictions
Portsmouth Sameday (Central)		Postcode type : United Kingdom PO[1-5]_ Mon Tue Wed Thu Fri Latest order time : 11:59 No deliveries Christmas or New Year No deliveries August Bank Holiday No deliveries Easter 2024, 2025
Portsmouth Sameday (Outer)	£ 5.00	Postcode type : United Kingdom PO[6-9]_ PO[1-2][0-9]_ Mon Wed Fri Latest order time : 11:59 No deliveries Christmas or New Year No deliveries August Bank Holiday No deliveries Easter 2024, 2025
Portsmouth Sameday (Isle of Wight)	£ 10.00	Postcode type : United Kingdom PO3[0-9]_ Tue Thu Latest order time : 11:59 No deliveries Christmas or New Year No deliveries August Bank Holiday No deliveries Easter 2024, 2025
Portsmouth Anyday		Postcode type : United Kingdom PO
Elsewhere (except Scottish Islands and Highlands)	£ 2.00	Postcode type : United Kingdom ! AB3[1-8]_ AB4[1-5]_ AB5[5-6]_ HS[1-9]_ KW1[5-7]_ PA[2-6][0-9]_ PA7[0-8]_ PH19_ PH[2-9] [0-9]_ FK1[789]_ FK2[178]_ PH1[5-8]_ IV KW ZE Ignore method if postcodes previously matched
Scottish Islands and Highlands	£ 20.00	Postcode type : United Kingdom Ignore method if postcodes previously matched

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

1.2 Installation Summary

- Install and enable this Hikashop shipping plugin.
plg_hikashopshipping_bfextrafeatures
- If required install and enable one or more postcode handling plug-ins.
plg_hikashopbfpostcodes_shippingnetherlands
plg_hikashopbfpostcodes_shippingunitedkingdom
- If required install and enable the delivery date plugin.
plg_hikashop_bfdeliverydates
 - You may also require one or more of the following.
plg_hikashop_bfdeliverydateslocker
- If using the delivery date plugin create a delivery date Hikashop custom field on the *order* table.
- Create one or more Hikashop shipping methods using this shipping plugin.

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

2. Specific Configuration

2.1 Basic

Without any specific configuration the plugin processes the Hikashop generic configuration and restrictions (i.e. same as the Hikashop Manual Shipping plugin).

<div><div>SPECIFIC CONFIGURATION</div><div><div>Delivery Dates</div><div>Postcodes</div><div>Price Restrictions</div><div>Help</div></div><div><div>Delivery date</div><div><div>Disabled</div><div>Enabled</div></div><div>Requires Hikashop custom field on order table of type 'shipping delivery date'.</div></div></div>	<div><div>SPECIFIC CONFIGURATION</div><div><div>Delivery Dates</div><div>Postcodes</div><div>Price Restrictions</div><div>Help</div></div><div><div>Postcode format</div><div><div>Default</div><div>▼</div></div><div>Enhanced shipping method postcode restriction and simple customer postcode validation.</div></div></div>
<div><div>SPECIFIC CONFIGURATION</div><div><div>Delivery Dates</div><div>Postcodes</div><div>Price Restrictions</div><div>Help</div></div><div><div><div>+</div></div><div>This allows you to increase (not override) the shipping method price.</div></div></div>	

The *Delivery date* option is only available when the separately available Hikashop plugin *plg_hikashop_bfdeliverydates* is installed, enabled and the corresponding delivery date Hikashop custom field type configured on the *order* table.

The *Postcode format* option is only available when one or more of the separately available Joomla plug-ins of type *plg_hikashopbfpostcodes* are installed, and enabled.

Hikashop Shipping Plugin With Extra Features

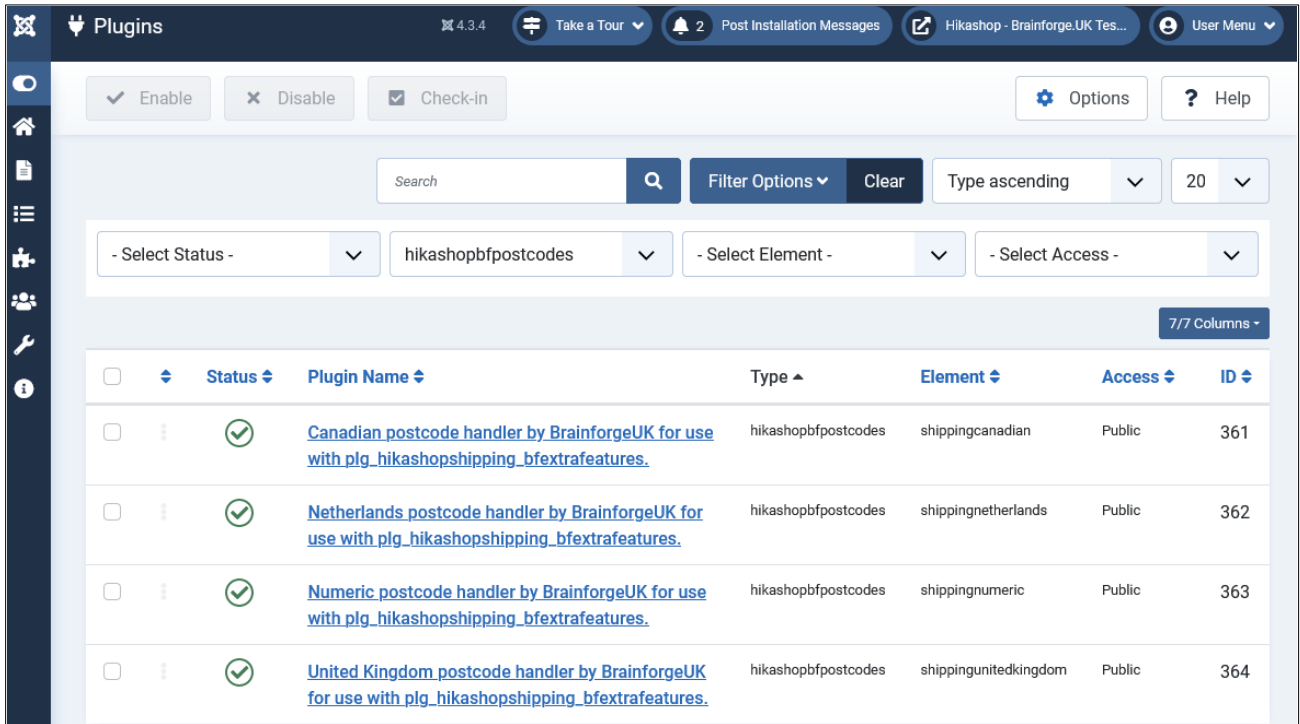

plg_hikashopshipping_bfextrafeatures

2.1.1 Supplied Postcode Formats

Most sites will only require one of the examples listed to be installed and enabled.

Other postcode formats available on request. Please [contact us](#) for further information.

These examples provide simple customer entered postcode format validation. This will detect where an O (letter) has been entered instead of a 0 (zero). Please [contact us](#) if you wish to use a database of all valid postcodes or postcode areas.

The screenshot shows the 'Plugins' management interface for the Hikashop Shipping Plugin. The top navigation bar includes 'Plugins', version '4.3.4', 'Take a Tour', 'Post Installation Messages', 'Hikashop - Brainforge.UK Tes...', and 'User Menu'. Below the navigation bar, there are buttons for 'Enable', 'Disable', and 'Check-in', along with 'Options' and 'Help' buttons. A search bar and 'Filter Options' are also present. The main content area displays a table of installed plugins, filtered by 'hikashopbfpostcodes'. The table has columns for 'Status', 'Plugin Name', 'Type', 'Element', 'Access', and 'ID'. Four plugins are listed, all with a status of 'Enabled' (indicated by a green checkmark) and 'Public' access.

Status	Plugin Name	Type	Element	Access	ID
Enabled	Canadian postcode handler by BrainforgeUK for use with plg_hikashopshipping_bfextrafeatures.	hikashopbfpostcodes	shippingcanadian	Public	361
Enabled	Netherlands postcode handler by BrainforgeUK for use with plg_hikashopshipping_bfextrafeatures.	hikashopbfpostcodes	shippingnetherlands	Public	362
Enabled	Numeric postcode handler by BrainforgeUK for use with plg_hikashopshipping_bfextrafeatures.	hikashopbfpostcodes	shippingnumeric	Public	363
Enabled	United Kingdom postcode handler by BrainforgeUK for use with plg_hikashopshipping_bfextrafeatures.	hikashopbfpostcodes	shippingunitedkingdom	Public	364

2.1.2 Valid Postcode Field Format (applies to all postcode formats)

Enter into this field a space separated list of postcodes (or first part thereof i.e. the area identifier).

Postcodes can be entered either as several on one line (space separated) or singly one on each line.

Regular expressions can be used to define valid postcodes.

Spaces in these postcodes can be included as underscore ('_').

For example in the United Kingdom PO1 1AA must be entered as PO1_1AA.

Comment lines can be included in the valid postcode list, the first character must be a hash (#).

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

2.2 UK Postcode Format

SPECIFIC CONFIGURATION			
Delivery Dates	Postcodes	Price Restrictions	Help
Postcode format	<div>United Kingdom</div> <div>Enhanced shipping method postcode restriction and simple customer postcode validation.</div>		
Ignore method if postcodes previously matched	<div>No</div> <div>Yes</div>		
Valid postcodes	<div>PO[6-9]_ PO[1-2][0-9]_</div> <div>Space separated list of postcodes (or area part). Replace any spaces in postcode with underscore ('_') e.g. for UK 'PO1_1AA'. Limited regular expression support e.g. for UK 'PO1[3-5]'.</div>		

To restrict a shipping method to only PO1 postcodes you must add an underscore () suffix (**PO1_**). Just PO1 on its own will match all of PO1, PO11, PO12, PO13 etc...

Entering an exclamation mark (!) at the beginning of the *Valid postcodes* field will negate the result. ! PO[1-2]_ will match everything except PO1 and PO2.

In this simple example PO[^1-2]_ would achieve the same result (using regular expression syntax).

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

2.3 Netherlands Postcode Format

SPECIFIC CONFIGURATION			
Delivery Dates	Postcodes	Price Restrictions	Help
Postcode format	<div>Netherlands</div> <div>Enhanced shipping method postcode restriction and simple customer postcode validation.</div>		
Ignore method if postcodes previously matched	<div>No</div> <div>Yes</div>		
Valid postcodes	<div>1420-1439 # This is a comment 1980-2235 # Multiple postcodes on one line 2300-2481 2800-2871</div> <div>Space separated list of postcodes (or area part). Replace any spaces in postcode with underscore ('_') e.g. for UK 'PO1_1AA'. Limited regular expression support e.g. for UK 'PO1[3-5]'.</div>		

This screenshot illustrates how you could define a single shipping method covering Amsterdam, Haarlem and Leiden.

Assuming no other restrictions apply this is easier to implement as a single shipping method than the Hikashop Manual shipping plugin.

Entering an exclamation mark (!) at the beginning of the *Valid postcodes* field will negate the result. For example:

! 1435 2230 2820-2029

will match everything except 1435 2230 2820, 2821, 2822 etc...

On the Hikashop shipping method admin listing (see screenshot in *Overview* section) this method will appear as follows (*Name* is the name of the shipping method):

Name	Price	Restrictions
Amsterdam, Haarlem and Leiden		Postcode type : Netherlands 1420-1439 1980-2235 2300-2481 2800-2871

2.5 Generic Numeric Postcode Format

SPECIFIC CONFIGURATION

Delivery Dates

Postcodes

Price Restrictions

Help

Postcode format

Generic numeric codes

Enhanced shipping method postcode restriction and simple customer postcode validation.

Ignore method if postcodes previously matched

No

Yes

Valid postcodes

A few random examples

1-20 1[0-9][123]

12345-67890 [789]012

123456-789012

Space separated list of postcodes (or area part).

Replace any spaces in postcode with underscore ('_') e.g. for UK 'PO1_1AA'.

Limited regular expression support e.g.for UK 'PO1[3-5]'.

Assuming no other restrictions apply this is easier to implement as a single shipping method than the Hikashop Manual shipping plugin.

This could be used instead of *Netherlands Postcode Format* examples above but in this case there will not be any validation of the address data (e.g. 123456789 could be entered).

Entering an exclamation mark (!) at the beginning of the *Valid postcodes* field will negate the result.

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

3 Delivery Dates

This feature requires the separate Hikashop plugin *plg_hikashop_bfdeliverydates* available from <https://brainforge.co.uk>.

In addition on the Hikashop order table a Hikashop custom field of type '*shipping delivery date*' must be configured and published. This field type is included in *plg_hikashop_bfdeliverydates*.

This feature requires [HikaShop Business](#).

3.1 Features Overview

- **Latest order time**
This defines the latest order time for the first available delivery day.
The first available delivery day may be today, tomorrow, 7 days after order etc...
If order being placed after that time then the first available delivery day will be the next one.
- **Minimum days before delivery**
Controls the earliest delivery date – set to 0 (zero) for same day, 1 for tomorrow.
- **Maximum days after order**
Controls how far in advance (before delivery) a customer can place an order.
Set to 0 (zero) for same day only orders, if order placed after latest order time then customer will have the option to order for the next delivery day (e.g. tomorrow).
- **Weekday deliveries**
Weekdays when deliveries are available can be selected.
When a weekday enabled the maximum number of deliveries for that weekday can be configured, unlimited deliveries option also available.
- **Delivery date overrides**
Deliveries on specific dates (e.g. Christmas day) can be blocked;
Additional deliveries dates (e.g. Mother's day) can be specified together with the maximum number of deliveries on that date.

In many shipping methods no override will be required as most of the overrides will be configured for the Hikashop delivery date custom field type using the order table specification. Refer to documentation for plugin *plg_hikashop_bfdeliverydates* for further information.

Overrides entered in the shipping method take preference over overrides in the custom field type options, the first override matching a possible delivery date determines the availability of that date.

Comments entered in the override field will appear in the restrictions column of the Hikashop shipping method admin listing (see screenshot in *Overview* section).

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

3.2 Weekday Deliveries Within 30 Days

This configuration will allow a customer to select a delivery date of any weekday within the next 30 days.

If they order before 12:00 then they can request delivery the same day.

If they order after 11:59 the earliest delivery day will be the next available weekday.

If the *Limited* feature is used then some days may not be available because the daily delivery limit has been reached.

Some days may not be available because of the Hikashop delivery date custom field type options.

Some additional days may be available because of the Hikashop delivery date custom field type options.

SPECIFIC CONFIGURATION	
Delivery dates	Postcodes
Delivery date	<div>Disabled Enabled</div> <p>Requires Hikashop custom field on order table of type 'shipping delivery date'.</p>
Latest order time	<div>11:59</div> <p>Latest order time for first available delivery day.</p>
Minimum days before delivery	<div>0</div> <p>Controls the first available delivery date. 0 = sameday delivery (nextday if after latest order time).</p>
Maximum days after order	<div>30</div> <p>Controls the last available delivery date. 0 = sameday delivery (nextday if after latest order time).</p>
Monday deliveries	<div>Unlimited None Limited</div>
Tuesday deliveries	<div>Unlimited None Limited</div>
Wednesday deliveries	<div>Unlimited None Limited</div>
Thursday deliveries	<div>Unlimited None Limited</div>
Friday deliveries	<div>Unlimited None Limited</div>
Saturday deliveries	<div>Unlimited None Limited</div>
Sunday deliveries	<div>Unlimited None Limited</div>
Delivery date overrides	<div># Special Christmas deliveries ...1224.:5</div> <p>Enter additional dates, on separate lines, when deliveries are (un)available. These take preference over delivery date overrides configured for the Hikashop delivery date order table custom field. In most instances the custom field data will suffice and this field can be left blank.</p>
Collection locker	<div>None 4 digit code</div> <p>This allows a customer to collect their order from a secure locker.</p>

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

3.2.1 Limiting Number of Daily Deliveries

Monday deliveries	<input type="button" value="Unlimited"/> <input type="button" value="None"/> <input type="button" value="Limited"/>
Tuesday deliveries	<input type="button" value="Unlimited"/> <input type="button" value="None"/> <input type="button" value="Limited"/>
Wednesday deliveries	<input type="button" value="Unlimited"/> <input type="button" value="None"/> <input type="button" value="Limited"/>
Thursday deliveries	<input type="button" value="Unlimited"/> <input type="button" value="None"/> <input type="button" value="Limited"/>
Friday deliveries	<input type="button" value="Unlimited"/> <input type="button" value="None"/> <input type="button" value="Limited"/>
Saturday deliveries	<input type="button" value="Unlimited"/> <input type="button" value="None"/> <input type="button" value="Limited"/>
Maximum number of daily deliveries	<input type="text" value="10"/>
Sunday deliveries	<input type="button" value="Unlimited"/> <input type="button" value="None"/> <input type="button" value="Limited"/>
Maximum number of daily deliveries	<input type="text" value="10"/>

In this example the maximum number of deliveries available at weekends is 10 per day. When the daily maximum exceeded the customer will not be able to select a delivery on that day.

Cancelled orders are not included in the daily total number of deliveries.

When the daily maximum is reached an optional email can be sent to the shop administrator. This can be configured through the Hikashop delivery date plugin parameters.

Enter a space separated list of locker numbers.
Comments can be included by starting a line with a # symbol.

Cancelled orders are not included in the daily total number of orders.

Hikashop Shipping Plugin With Extra Features

plg_hikashopshipping_bfextrafeatures

4 Price Restrictions

This screenshot illustrates a shipping plugin which has different shipping prices according to the size of the order.

- Shipping charged at £1 for orders below £40.
- Shipping charged at £0.50 for orders above £39.99 and below £80.
- Shipping free for orders over £79.99.

Without this feature implementing this would require 3 shipping methods one for each price criteria. If you have lots of shipping methods for different postcode / delivery date combinations the number of methods can quickly multiply making maintenance difficult.

#	<input type="checkbox"/> Name	Price	Restrictions	Type	Order	<input type="checkbox"/> Delete	<input checked="" type="checkbox"/> Published
1	<input type="checkbox"/> Portsmouth Sameday (Central)		Postcode type : United Kingdom PO[1-5] Mon Tue Wed Thu Fri Latest order time : 11:59 No deliveries Christmas or New Year No deliveries August Bank Holiday No deliveries Easter 2024, 2025 Additional shipping prices (by order value) 0->£ 39.99=£ 1.00 £ 40.00->£ 79.99=£ 0.50	Hikashop shipping plugin providing extra features by BrainforgeUK	1	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Price: 1

Minimum Price Restriction: 0

(c) 2024 Jonathan Brain

Appendix

A.1 Special Christmas Deliveries

In a typical configuration the Hikashop delivery date custom field type may be configured to disallow deliveries on Christmas day.

You can override this in the shipping method to achieve the following:

- Up to 10 deliveries on 24th December (any year, any day of week)
- Up to 5 deliveries on 25th December (any year, any day of week)
- Order must be placed before 20th December
- Order must be placed after 20th November

This can be achieved by creating a shipping method with this specific configuration.

- **Minimum days before delivery**
6
- **Maximum days after order**
31
- **Delivery date overrides**
Special Christmas deliveries
....1224.:10
....1225.:5
No deliveries on other days of year
.....:0

A.2 Daily Delivery Slots

You can define multiple delivery slots by creating a separate shipping method for each slot.

Typically the *Latest order time* for each slot will be set to 23:59. The following examples describe situations where a different value might be appropriate.

A.2.1 Same Day Delivery Slots

You need to specify an appropriate *Latest order time* for each slot.

The *Maximum days after order* field must be set to 0 (zero).

A.2.2 Next day (e.g. tomorrow) Delivery Slots

Typically the *Latest order time* for each slot will be set to 23:59, although it can be earlier if additional order preparation time is required.

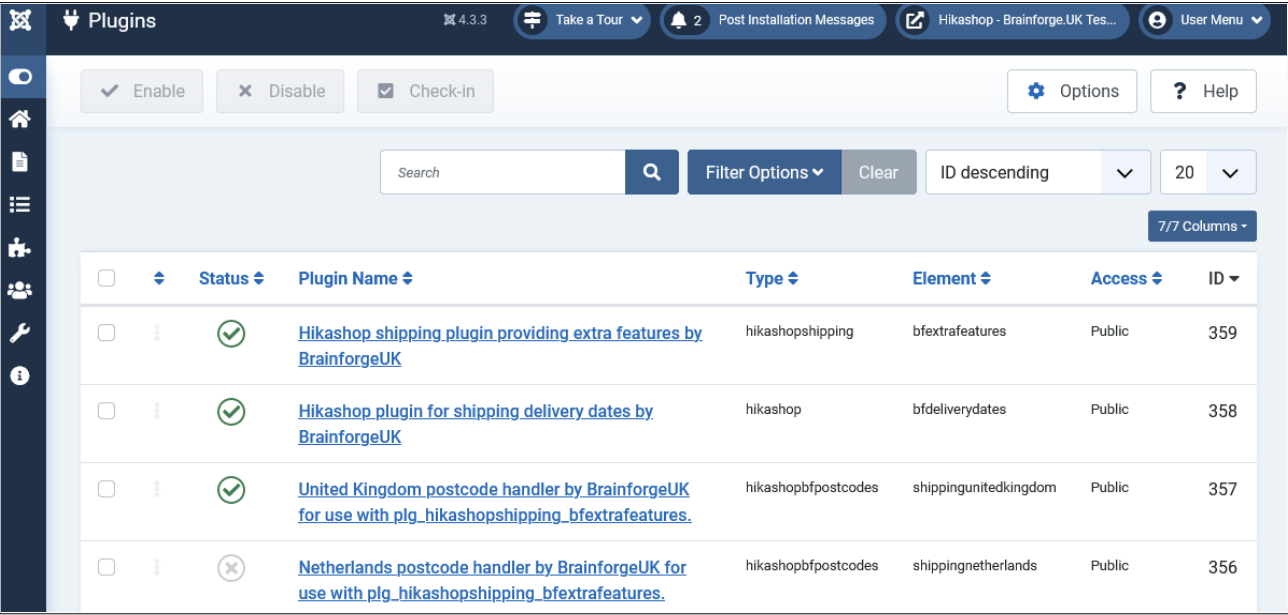

You might also consider a configuration like this:

- *Latest order time* of 11:59 for morning delivery slots.
- *Latest order time* of 23:59 for afternoon delivery slots.

Hikashop Shipping Plugin With Extra Features
